# Definitions

Relevant regulation: Article 2 of Reg (EU) 2019/947

## UAS

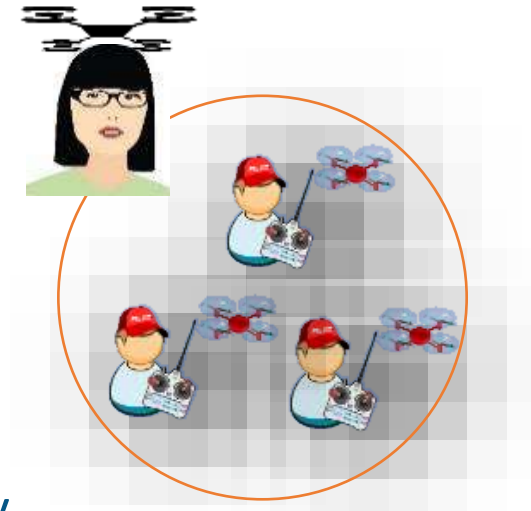

## Model aircraft = UAS

However special provisions apply

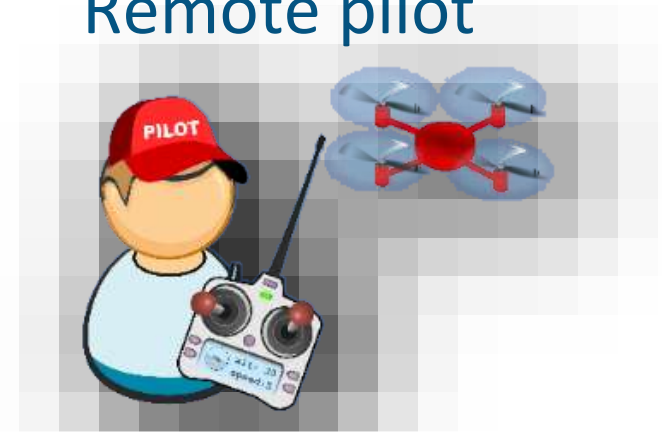

## UAS Operator

## Involved person

## Remote pilot

# Legal Basis and scope of competences

Regulation (EU) 1139/2018 (new EASA Basic Regulation) extends **the EU competence to all UAS** :

- EASA carries out on behalf of Member States the functions and tasks of the state of designs for all UAS (type-certificate (TC); draft implementing rules: requirements; Oversight MS National Aviation Authorities NAAs))
- MS NAAs issue certificate of airworthiness for individual UAS in compliance with TC, and authorisations to operators, when required
- Only civil drones but ..... possibility to 'opt in' for aircraft carrying out services of state, military, firefighting, search and rescue, coast guard nature

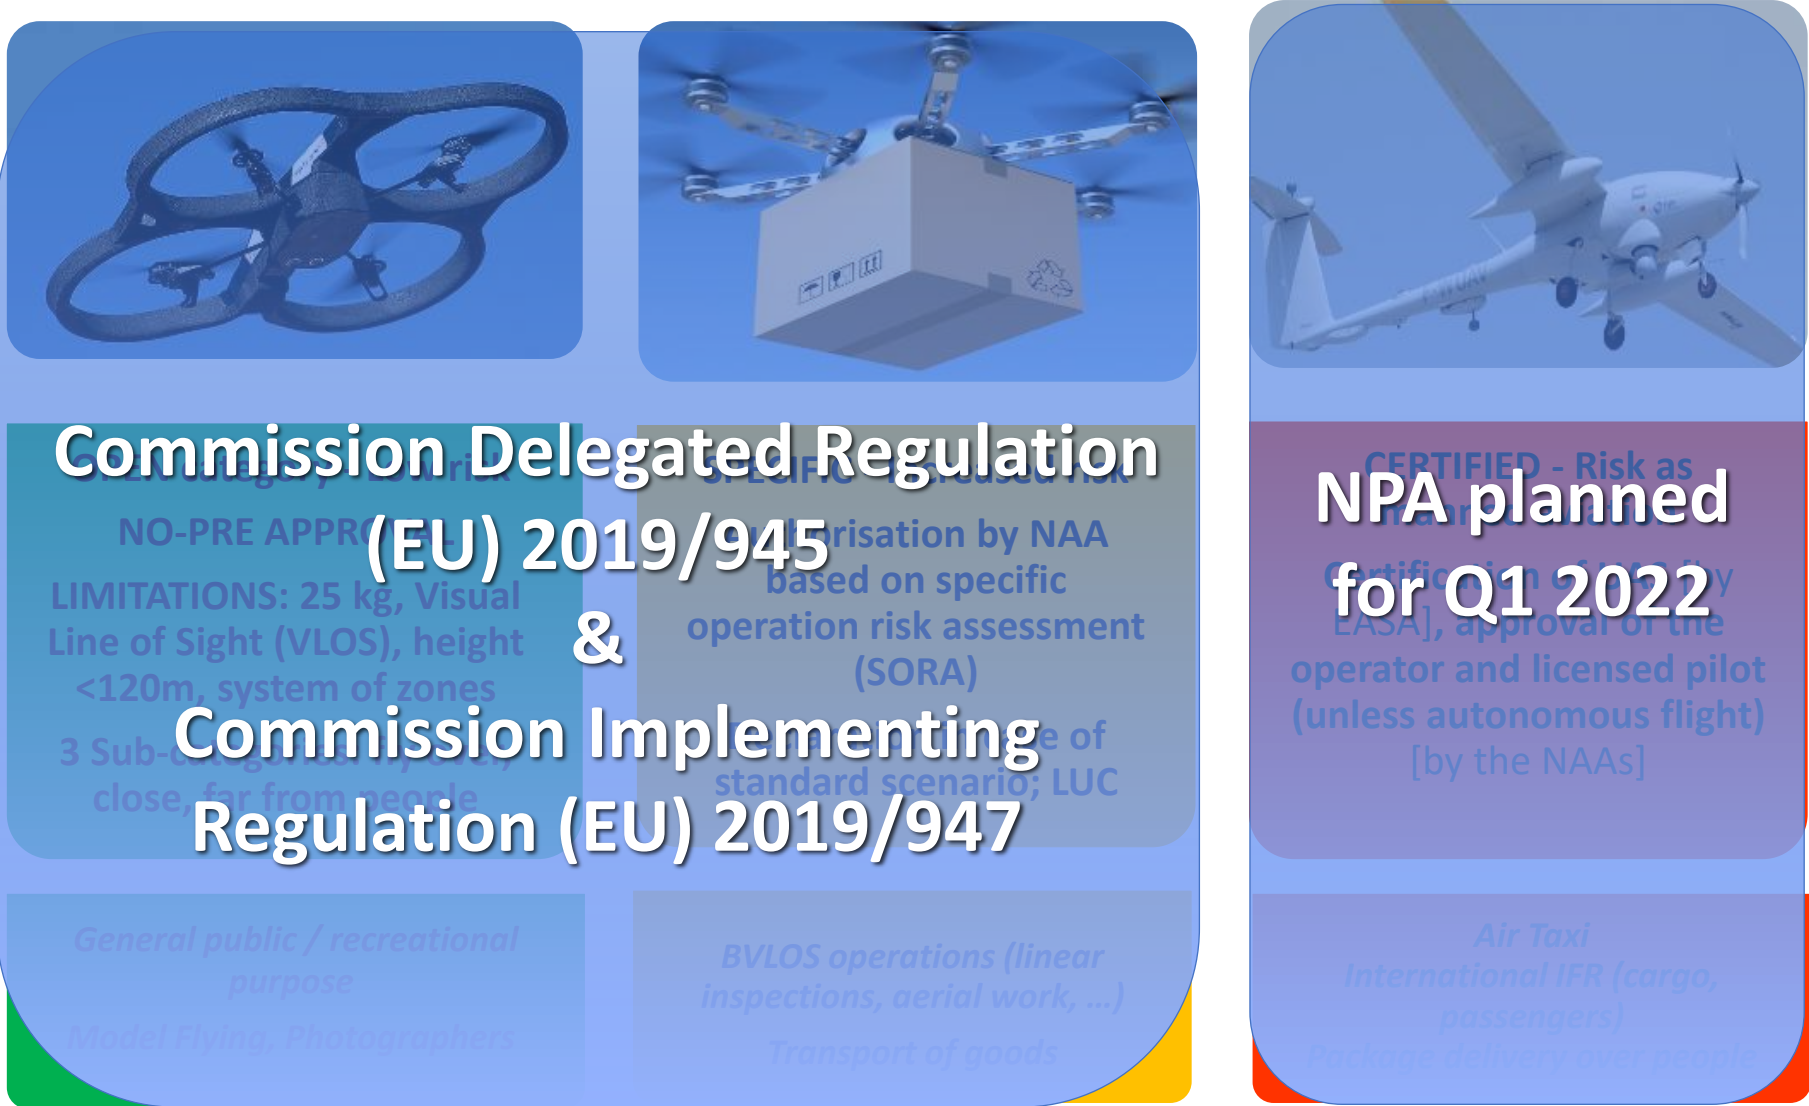

# The 'DRONE' Regulation

- Commission Implementing Regulation (EU) **2019/947**
  - Rules + Procedures for operation of UAS
  - Registration
- Commission Delegated Regulation (EU) **2019/945**
  - Rules + technical requirements: design+ manufacturing, maintenance of UAS
  - Rules for Third Country Operators
- 3 categories of UAS operations: **Open**, Specific and Certified
- **They directly replaced national regulations**

# Registration of UAS operator

UAS Operators shall register themselves when they operate:

## ➤ In the open category:

- UAS with an MTOM > 250g
- UAS (non toys) with an MTOM < 250g equipped with a sensor able to capture personal data
- UAS which, in the case of an impact, can transfer to a human a kinetic energy greater than 80 Joules (e.g. a UAS with MTOM = 250 g and speed > 130 km/h)

## ➤ In the specific category: All operators

Member State of residence or main place of business

# Registration of UA

Not applicable to OPEN  
category

The UA shall be registered when a  
certificate of airworthiness is required

# Tools for enforcement authorities (E-identification)

## ➤ Interoperable & real-time registration databases for:

- UAS operators
- certified unmanned aircraft

## ➤ Each drone will broadcast the following information:

- UAS operator registration number and UA unique serial number
- Remote pilot or UA take-off position
- UA current position, height, timestamp
- Direction and speed of the UA

## ➤ UA marked with UAS operator registration number

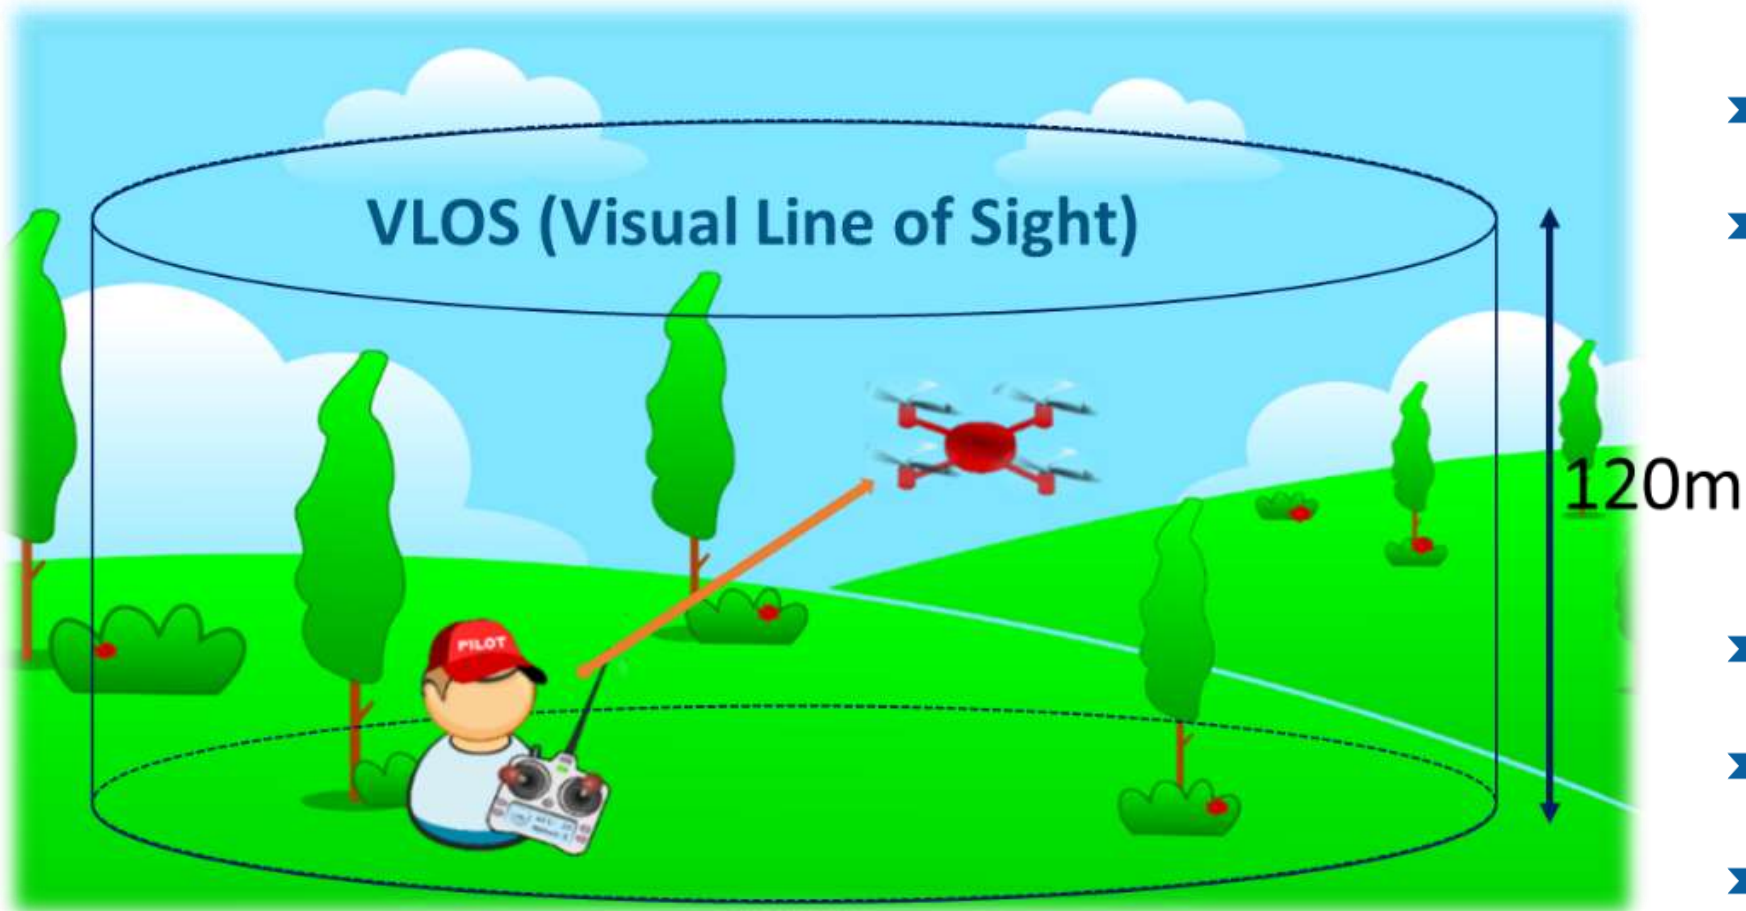

# UAS operator registration number (example)

# Open category – the main boundaries

- MTOM < 25 Kg
- Remote pilot minimum age 16, unless supervised (it may be reduced to 12, no minimum age for toys)
- No carriage of dangerous goods
- No dropping of material
- No autonomous operations

- A1 fly over people
- A2 fly close to people
- A3 fly far from people

Privately built  
with MTOM<250g

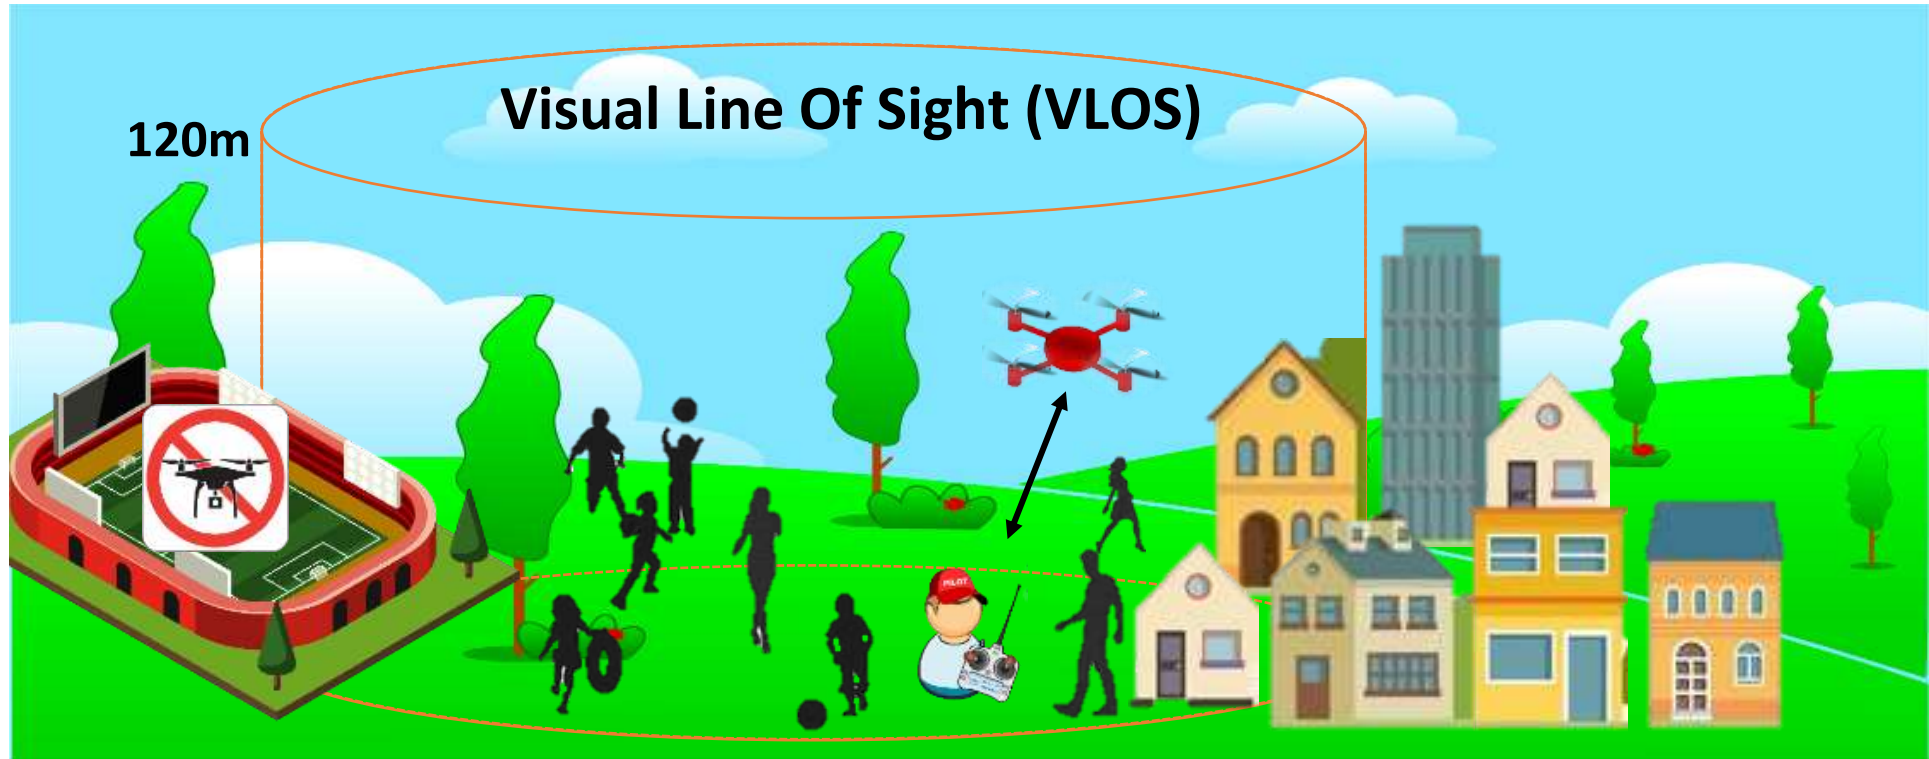

Privately built  
with MTOM<25kg

# Open category - Subcategory A1

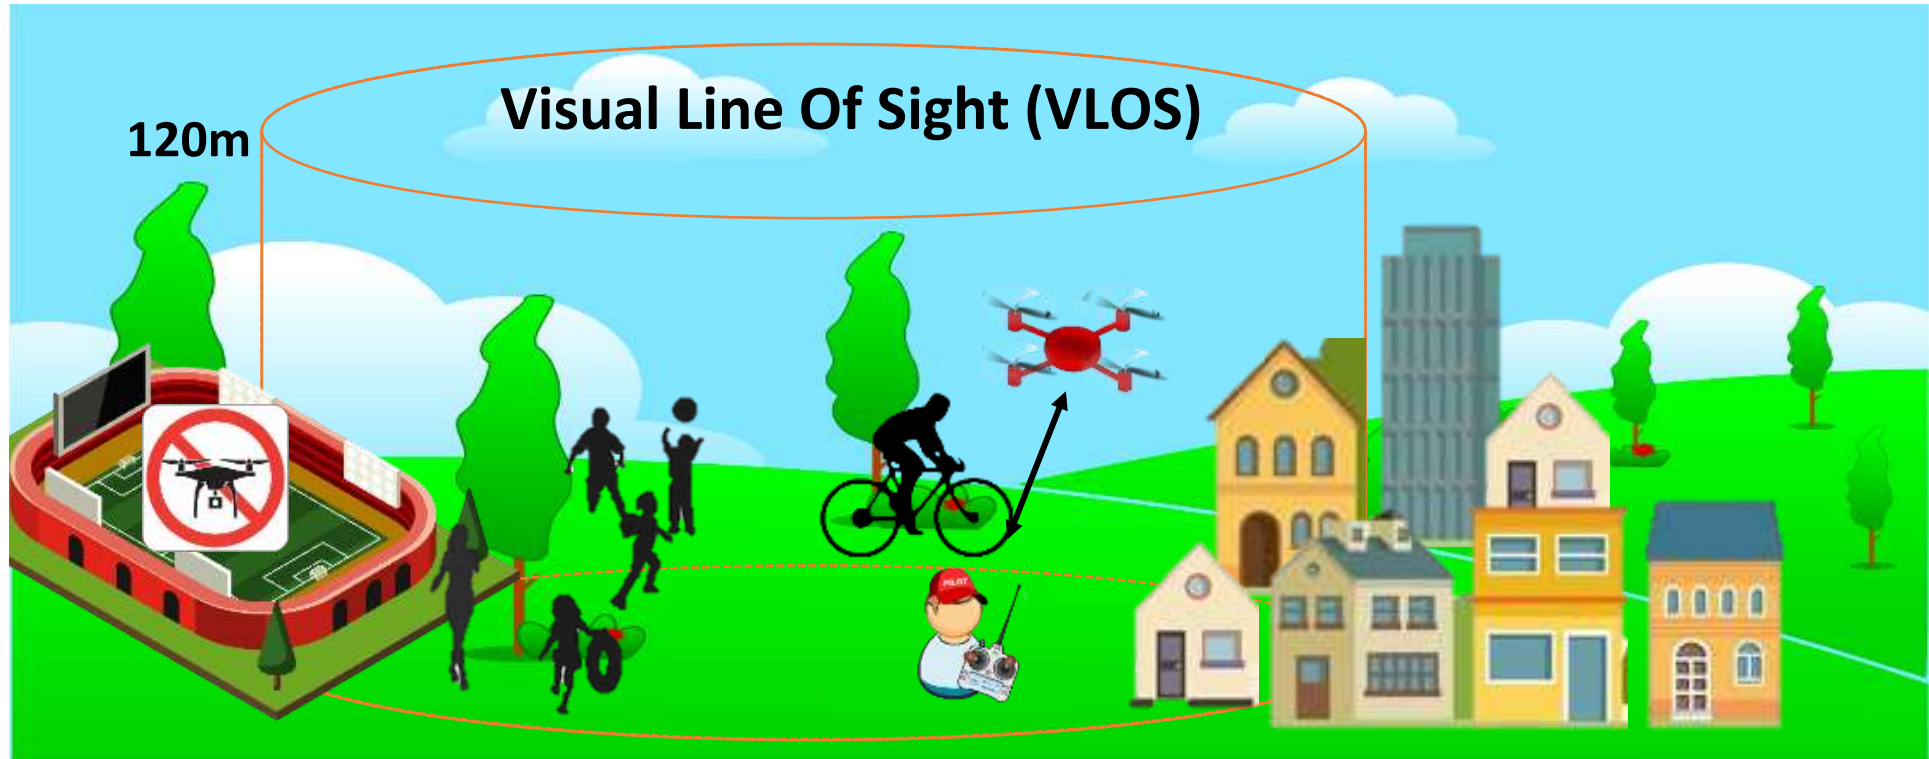

MTOM<250g

➤ No fly over assembly of people

Privately built  
with MTOM<250g  
and maximum  
speed of 19 m/s

# Open category - Subcategory A1

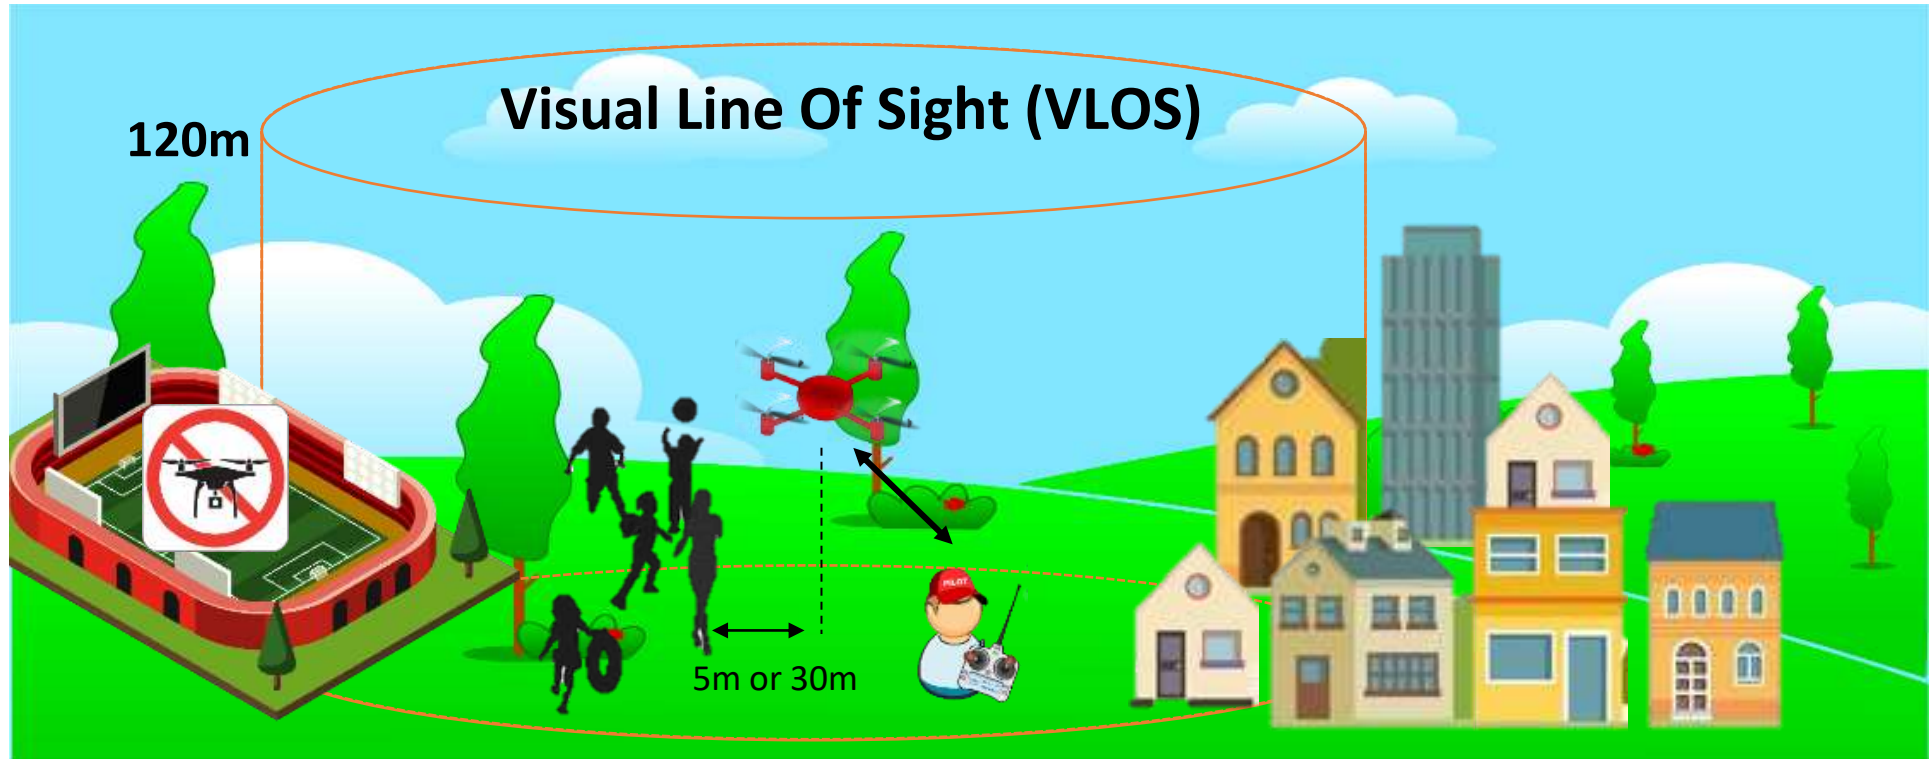

- No fly over assembly of people
- reasonably expect that no uninvolved person is overflown. In case of unexpected overfly over uninvolved persons, the remote pilot shall reduce as much as possible the time during which the unmanned aircraft overflies those persons

with MTOM<25kg

Privately built  
with MTOM<250g

➤ No fly over uninvolved people

➤ conducted in an area where the remote pilot reasonably expects that no uninvolved person will be endangered within the range where the unmanned aircraft is flown during the entire time of the UAS operation

Regulatory ref: UAS.OPEN.040 Annex Part A of EU Reg. 2019/947

# Rules made simple for UAS operators - Leaflets

Each drone package will include consumer information

This drone is an aircraft.  
Aviation law applies.

**As a drone pilot,  
you are responsible  
for flying your drone safely.**

**Before flying, as a drone pilot, you must**

- ✓ make sure the drone owner is registered at his or her national authority (unless already registered)
- ✓ make sure the owner registration number is displayed on the drone
- ✓ read and follow the manufacturer's instructions

DO	DO NOT
 <p>Make sure you are adequately insured</p>	 <p>Do not fly over large group of people</p>
 <p>Check for no-fly zones and any limitations in the area where you want to fly</p>	 <p>Do not fly higher than 120m from the ground</p>
 <p>Keep the drone in sight at all times</p>	 <p>Do not fly near aircraft &amp; in the proximity of airports, helipads or where an emergency response effort is ongoing</p>
 <p>Maintain a safe distance between the drone and people, animals and other aircraft</p>	 <p>Do not infringe other people's privacy.</p>
 <p>Inform your national aviation authority immediately if your drone is involved in an accident that results in a serious or fatal injury to a person, or that affects a manned aircraft</p>	 <p>Do not record intentionally or publish photographs, videos or audio recordings of people without their permission</p>
 <p>Operate your drone within the limits defined in the manufacturer's instructions</p>	 <p>Do not use the drone to carry dangerous goods or to drop material</p>
	 <p>Do not modify your drone.</p>

# Training for remote pilot: subcategory A1/A3

Privately built  
with MTOM<250g

- Familiarisation with the manufacturer's instructions

Privately built  
with MTOM<25kg

- Familiarisation with the manufacturer's instructions
- Complete the online training
- Pass the online test

Remote Pilot training proof  
of completion number

After passing the examination, the MS  
issues the proof to the remote pilot

# Training for remote pilot: subcategory A2

- Familiarisation with the manufacturer's instructions
- Complete the online training
- Pass the online test
- **Conduct a self-practical training in a “safe” area (A3 subcategory conditions)**
- **Declare completion of the practical training**
- **Pass a written test in an entity recognised by the competent authority**

# Open category: renewal of training for remote pilots

- online theoretical competency and certificate of remote pilot competency are valid for **5 years**

- Competencies need to be re-demonstrated or remote pilot may attend a seminar provided by the NAA or an entity recognised by the NAA

# UAS operator registration number vs remote pilot training proof of completion number

# Responsibility of the UAS operator

develop operational procedures adapted to the type of operation and the risk involved

ensure efficient use of radio spectrum

designate a remote pilot for each UAS operation

ensure that the remote pilots and all other personnel performing a task in support of the operations have the required competency and informations

# Responsibility of the remote pilot

keep the UA in VLOS and maintain a thorough visual scan of the airspace surrounding the UA in order to avoid any risk of collision with any manned aircraft. Discontinue the flight if the operation poses a risk to other aircraft, people, animals, environment or property

remote pilots may be assisted by an UAS observer, situated alongside them, who, by unaided visual observation, assists in safely conducting the flight

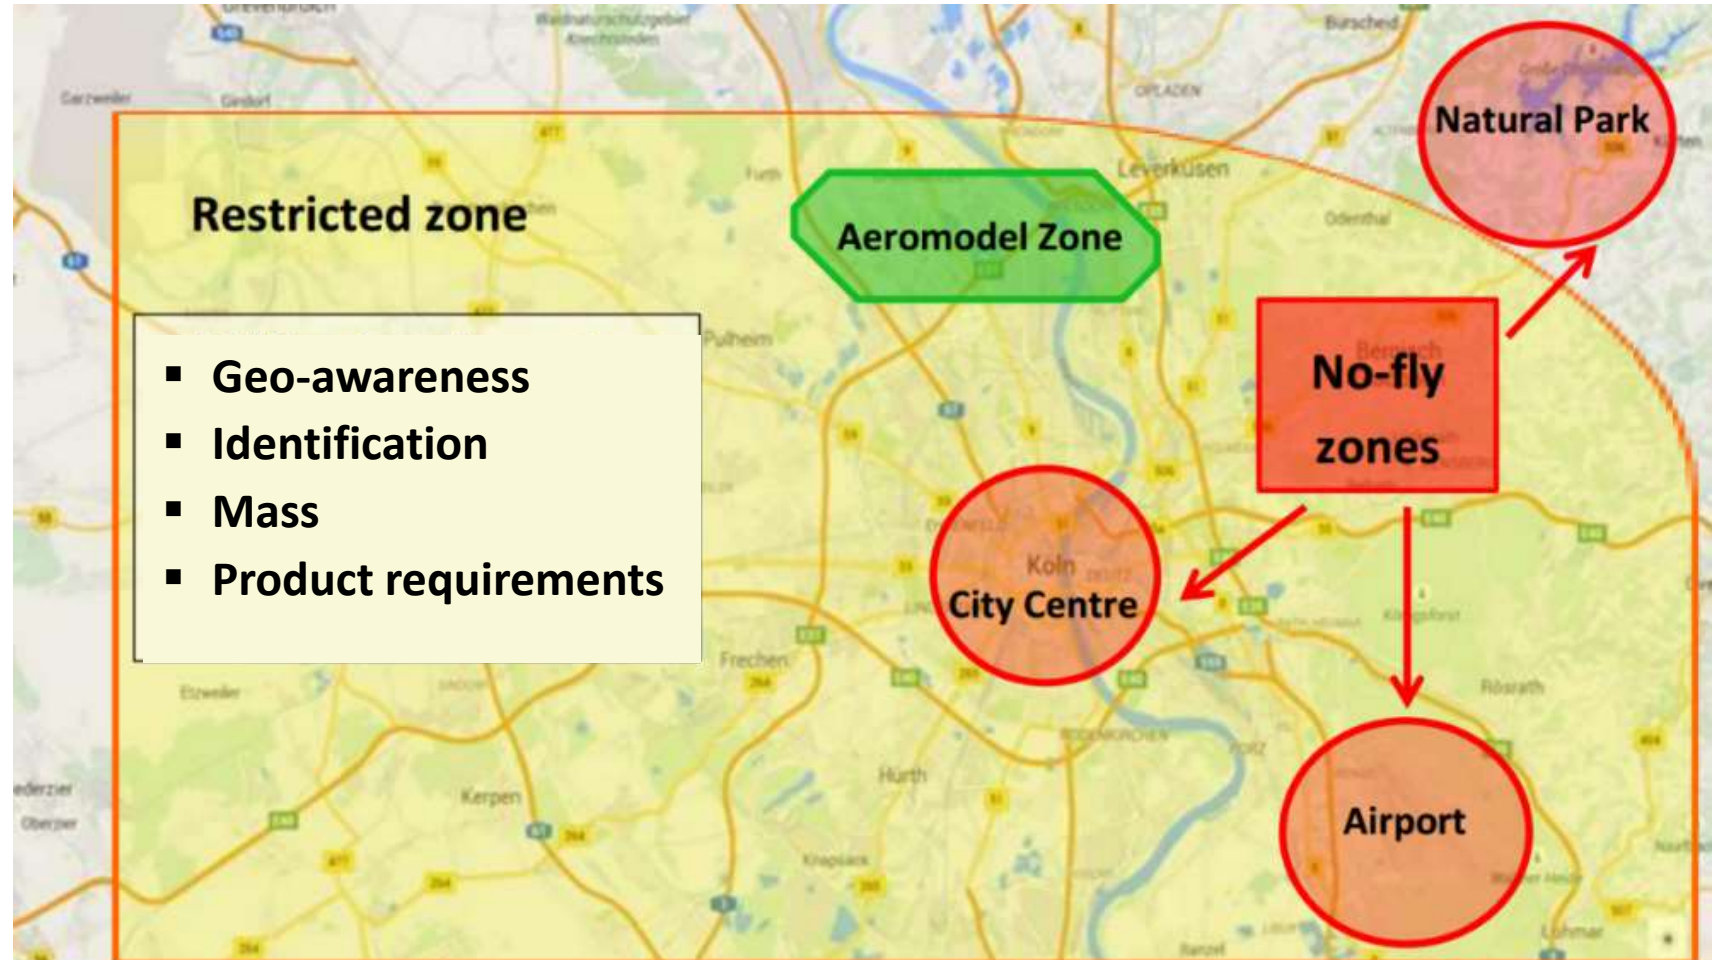

not fly close to or inside areas where an emergency response effort is ongoing unless with permission

# Flexibility for Member States

## Geographical zones defined by Member States

Geo-awareness on  
drones to support  
remote pilots

# Model aircraft

Regulatory reference: Art.16 of EU regulation 2019/947

## Option 1 - Article 16 regulation (EU) 2019/947

- Model clubs and associations may receive an authorisation from the NAA defining the applicable conditions (i.e. NAA may define the full set of rules such as minimum age, maximum altitude etc..). Registration as UAS operator still mandatory
- All members of an authorised model club or association must operate according to the procedures of the club or association

### Option 2

Fly in areas designated by the NAA where different conditions apply

### Option 3

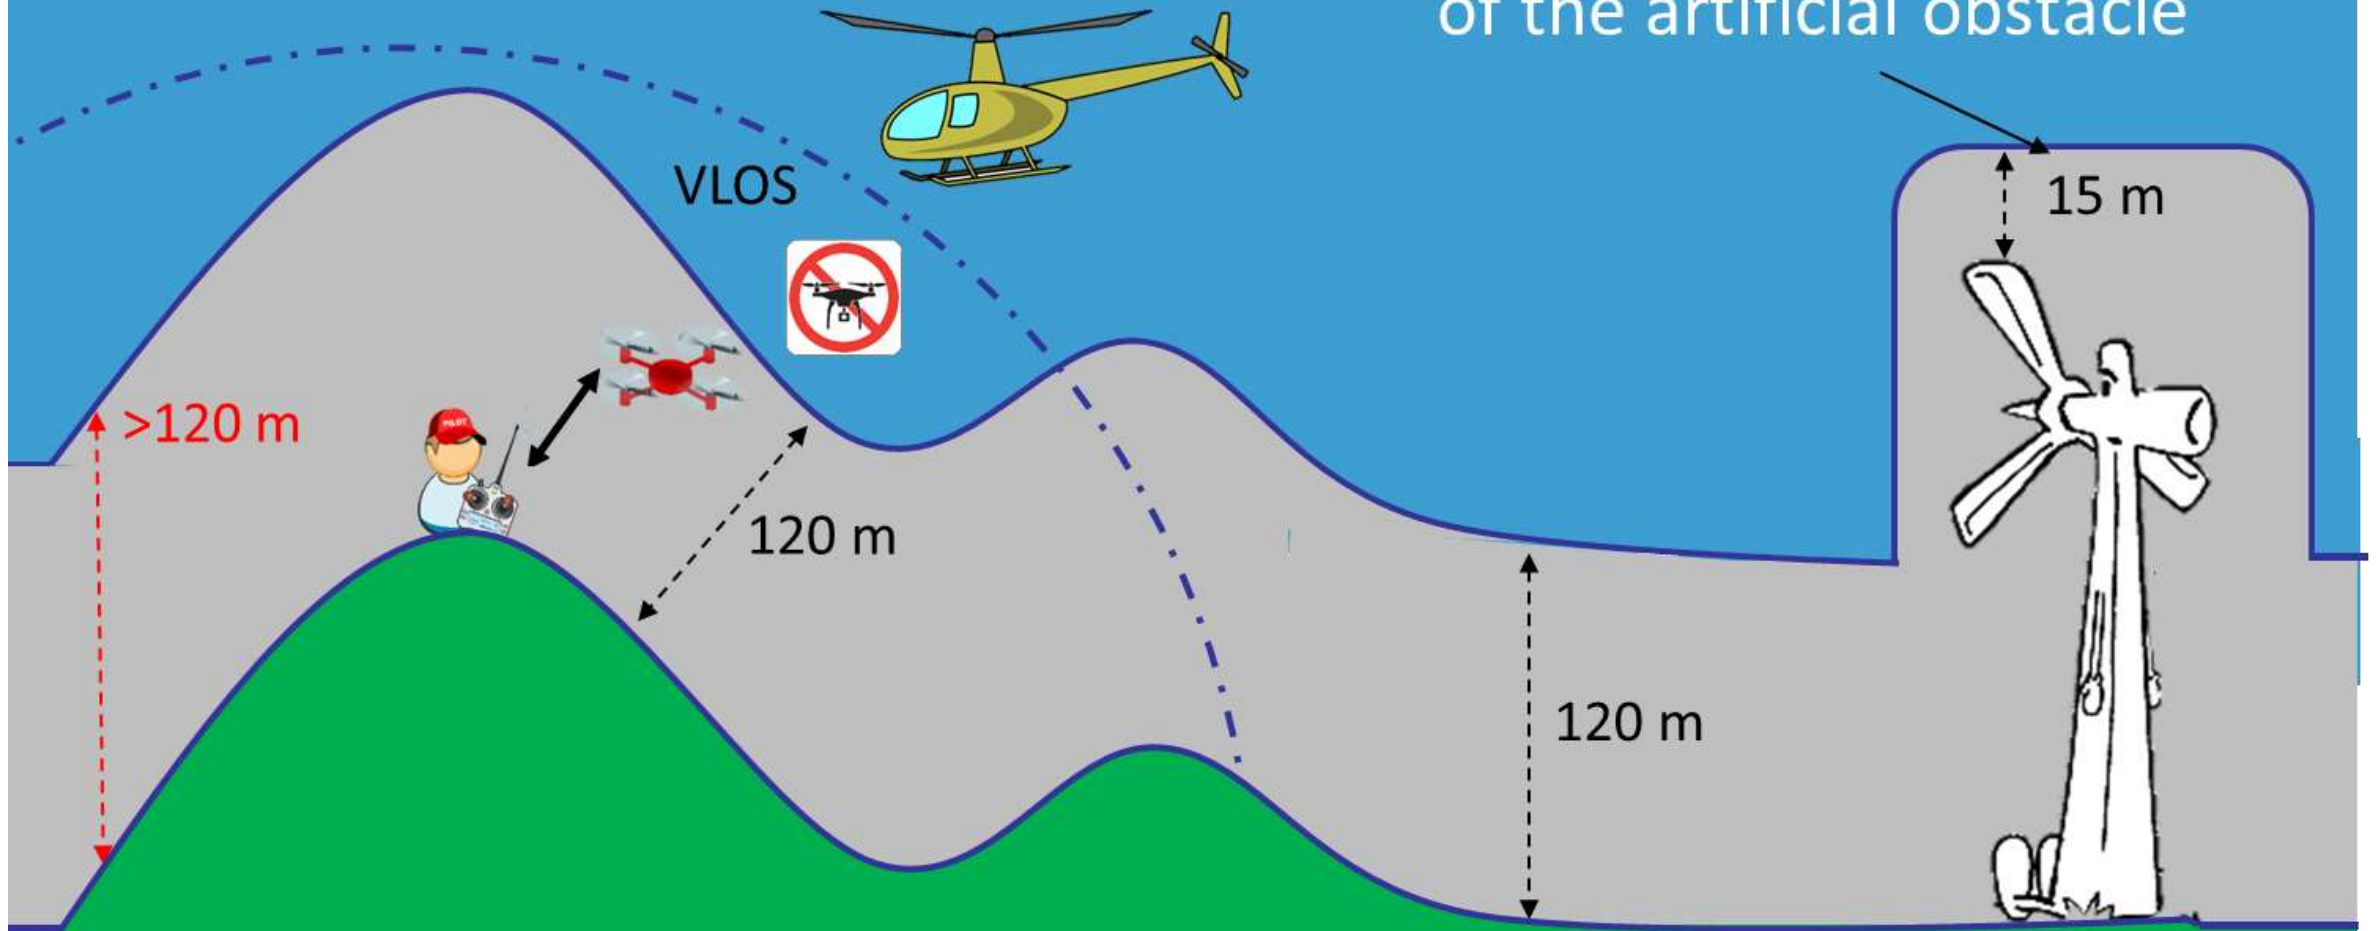

Fly in subcategory A3

Privately built  
with MTOM<25kg

# Flying in a hilly environment and over obstacles

Upon request of the owner of the artificial obstacle

# Summary of 'open' category

Buy

Register as operator

Train the remote pilot

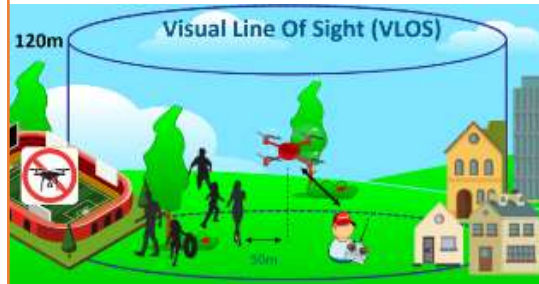

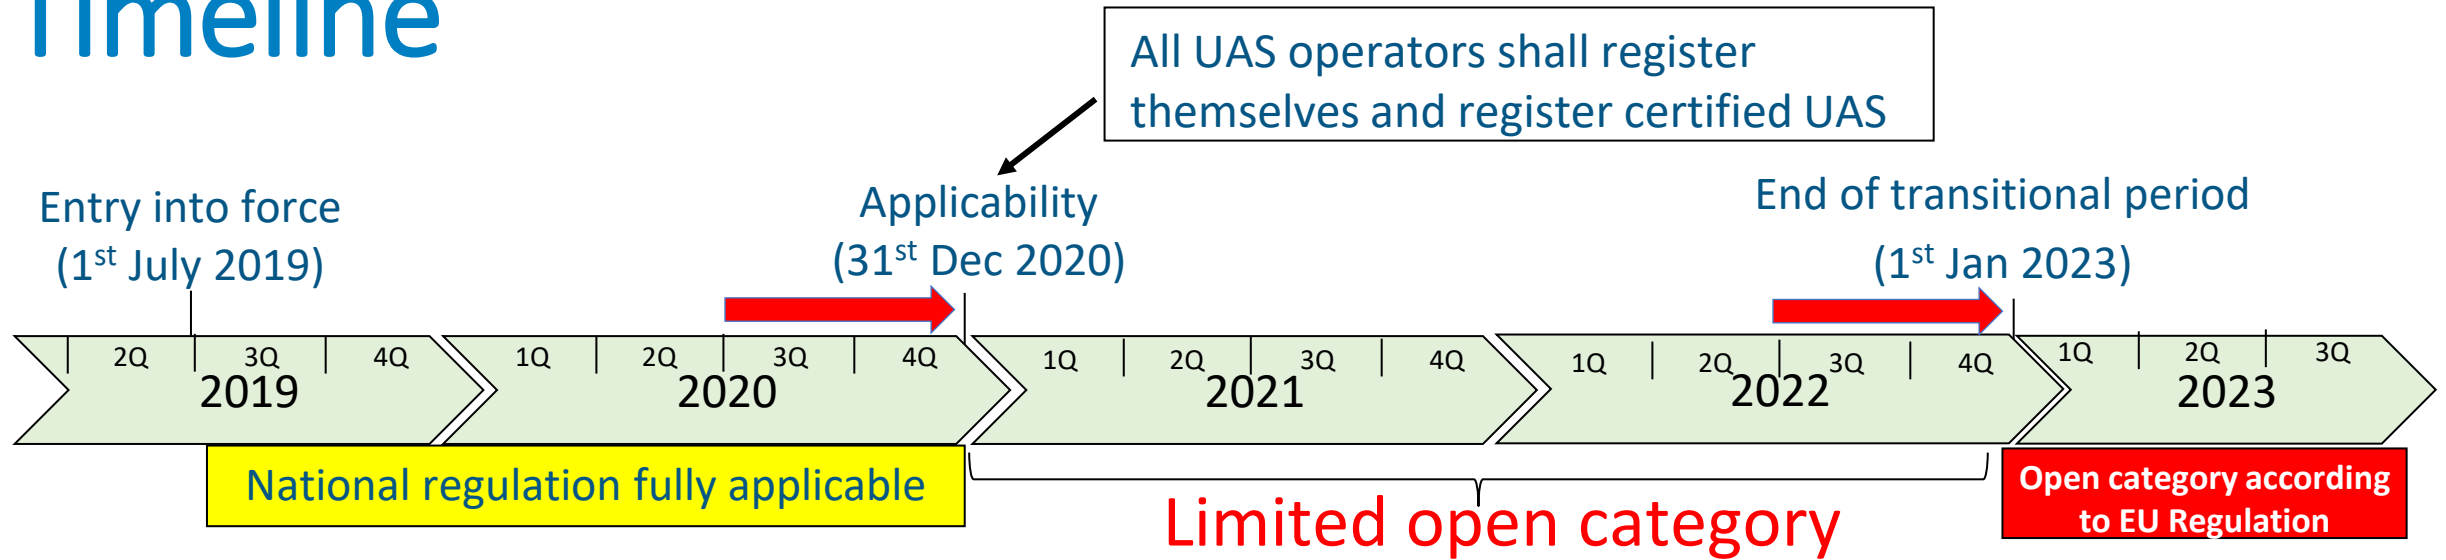

Fly respecting rules
